Hawk-IIc
Key Management Platform

eNOVA ®

The Hawk-IIc is the Enova's newest generation of key management platform which is suitable for a corporation or a small company to easily manage their own secure-key. The Hawk-IIc can work in two different modes, the "Stand Alone Mode" and the "Host Mode". In Stand Alone mode you can easily duplicate a key without connecting the Hawk-IIc to your Host PC. In Host Mode you will need to connect Hawk-IIc to your Host PC via the USB connection. The Host Mode provides three different programming modes for the flexibility.

Feature

- Two Modes of Operation.
  - **- Stand Alone Mode**
  - **- Host Mode**
- Small from factor and easy to carry out
- Fully support all Enova Secure-Key
- USB Compliant

Specification

- LCD Display: 16x2 WORDs
- Dimension: 16cm(L) x 11cm(W) x 4.5cm(H)
- Weight: 0.5 Kgs
- Operating Temperature: +5°C to +45°C
- Operating Humidity: 90% noncondensing

Supporting Windows Operation Systems

- Win 95/98/98-SE/Me/2000/XP
